        B386 --> B390[390 Root server 50 notifies seller's broker/dealer and buyer's broker/dealer of details of transaction, updates master database, and transmits update info to replica servers]
        B390 --> B394[394 Replica servers update replica databases and transmit updated info to subscribers of order book for stock sold by seller to dealer]
        B394 --> B398[398 Seller's broker/dealer server/database and buyer's broker/dealer server/database notify applications of seller and buyer that transaction is confirmed, and current positions and related displays are updated]
    end
  
```

The flowchart 1000 illustrates the process of a seller placing a sell order and a buyer accepting it, involving a root server 50 and multiple replica servers. The process is divided into three main vertical paths:

- Seller's Process (Left Column):**
  - 310 Seller activates connection status display and connects to seller's broker/dealer server/database
  - 314 Application displays master trade screen and connects to load balancer
  - 318 Load balancer transfers connection to a replica server
  - 322 Seller selects a stock of interest
  - 326 Application sends identity of seller's selected stock to replica server
  - 330 Replica server/database adds seller's ID to subscriber list for order book for selected stock
  - 334 Replica server sends order book info to seller's application and continues to update in real time
  - 338 Application uses order book info to fill in order book display and related displays
- Root Server 50 Process (Middle Column):**
  - 342 Seller views order book display and related displays and fills in trade ticket for a sell order and selects "Order Verification"
  - 346 Seller views final verification screen and selects "Send Order"
  - 350 Order is transmitted to seller's broker/dealer server/database, which checks that seller has sufficient shares in his account
  - 354 Seller's broker/dealer server/database sends approved sell order to root server 50, which attaches system ID to order, identifying account, order, & seller's broker/dealer
  - 358 Root server 50 updates master database order book info
  - 362 Updated order book info is transmitted to replica servers, which update replica databases
  - 366 Each replica server with connected users which subscribe to said order book sends seller's sell offer to those users' applications, along with updated order book info
- Buyer's Process (Right Column):**
  - 370 Applications which receive seller's sell offer display that order in order book display
  - 374 Buyer sees seller's sell offer and accepts offer
  - 378 Buyer's buy order (accepting seller's sell offer) is transmitted to buyer's broker/dealer server/database, with system ID of seller's offer
  - 382 Buyer's broker/dealer server/database checks to see that buyer has sufficient funds in his account
  - 386 Buyer's broker/dealer server/database sends approval order, along with buyer's ID & system ID of seller's offer
  - 390 Root server 50 notifies seller's broker/dealer and buyer's broker/dealer of details of transaction, updates master database, and transmits update info to replica servers
  - 394 Replica servers update replica databases and transmit updated info to subscribers of order book for stock sold by seller to dealer
  - 398 Seller's broker/dealer server/database and buyer's broker/dealer server/database notify applications of seller and buyer that transaction is confirmed, and current positions and related displays are updated

## Negotiation Default Setup Screen

Enter the default values for limiting negotiations from other traders

Please note that the values you enter in the default settings will have a significant effect on the incoming orders you receive from other traders. The values you enter are defaults which can be overridden at any time by simply typing over the defaults in the negotiations screen.

1 What price above and below your limit price are you willing to negotiate?

Enter price increment here in 1/16 0.25

4105

2 What # of shares below and above your order size are you willing to negotiate?

Enter number of shares here 100

4110

3 What will be your default preferred negotiation time?

Enter desired increment here 10 min.

4115

4 What will be the lower time limit you will accept?

Enter minute increment here 2 min.

4120

Setting the defaults for each time you click the adjustment buttons

5 What will the increment be for each click of size change buttons?

Enter size increment here 100 shares

4125

6 What will the increment be for each click of time change buttons?

Enter size increment here 1 min.

4130

7 What will the increment be for each click of price change buttons?

Enter size increment here 0.0625

4135

8 On limit orders that you enter, do you want to have the system allow negotiations as your default settings? oYES or oNO

See on-line help (for details click here)
